

AMANI MEDINI

Data Analyst

amani.benslah.medini@gmail.com | +216 92495755 | Ariana, Tunisia | LinkedIn: linkedin.com/in/amani-medini-9a0791149

Summary

Detail-oriented Data Analyst with 3+ years of experience analyzing complex technical datasets in high-reliability engineering environments, complemented by hands-on Formation Data & Business Intelligence training (advanced SQL, Python analytics, and retail BI). Skilled in SQL (joins, CTEs, window functions), Python (pandas, NumPy), Power BI, validating large datasets, KPI reporting, and translating findings into actionable insights.

Technical Skills

Languages & Querying: SQL (joins, subqueries, CTEs, window functions, views, stored procedures), Python (pandas, NumPy)

Visualization & BI: Power BI, Matplotlib, Seaborn, Plotly, Dash; KPI dashboards, SQL reporting & pivot analyses

Tools & Platforms: Jupyter, SQL Server, PostgreSQL, Git, JIRA, INCA (data calibration & diagnostics)

Analytical Methods: Data Cleaning & Validation, EDA, RFM Segmentation, Time-Series (YTD/MTD), Feature Engineering, Statistical Analysis (correlation, hypothesis testing, regression), Root-Cause & Defect Trend Analysis, Reporting & Documentation

Professional Experience

E-Powertrain Software Tester - KPIT Engineering

Apr 2025 - Dec 2025

- Analyzed and validated large-scale Hardware-in-the-Loop (HiL) test datasets for ECUs, BMS, and Relay Boxes, identifying performance trends and system anomalies.
- Automated data collection and defect-tracking workflows in JIRA, improving data traceability and cutting analysis turnaround time.
- Extracted, cleaned, and interpreted calibration and diagnostic data using INCA to support parameter optimization and reporting.

Automotive Software Tester - Capgemini Engineering

Sep 2022 - Mar 2025

- Built Python-based automation scripts to generate and analyze test-result data for E/E vehicle systems (BMW Gen6, G2X platforms), improving data accuracy and reporting reliability.
- Consolidated and analyzed validation datasets spanning BMS, wiring, ECUs, and CAN networks, converting raw results into clear, actionable reports for engineering teams.
- Tracked and reported defect and test-coverage metrics in JIRA, supporting data-driven decisions across hardware, software, and systems teams.

Product Owner - UTIK

Mar 2021 - Jun 2022

- Analyzed product requirements and stakeholder input to define structured, data-informed functional specifications.
- Prioritized product backlog using data on technical risk, system dependencies, and delivery milestones.
- Coordinated cross-functional teams to align data-related deliverables with business objectives.

Education

Master's Degree in Electronics - Microelectronics and Instrumentation

Monastir University, Tunisia | Sep 2019 - Jun 2022

Certifications

- Formation Data & Business Intelligence** - Manel Hamdi (2026): SQL & relational modeling, advanced SQL (window functions, CTEs, views, stored procedures), Python (NumPy, pandas), data cleaning & transformation, RFM & time-series analysis, statistics, Matplotlib/Seaborn visualization; retail fil-rouge project (Sales, Product, Customer, Store)
- Women Developer Academy (WDA) - Women Techmakers (2024)
- Google Cloud Data Analytics Certificate - Google (Coursera)
- Google Cloud Professional Data Engineer Certification - Google (Coursera)
- Google Project Management Professional Certificate (v2) - Google (Coursera)

Additional Information

Languages: Arabic (Native), English (Limited working), French (Limited working), German (Elementary)

Awards: Top 10 AI Artathon Qualified Team - Global AI Summit, Riyadh (2020); Capgemini Tech Talk Presenter (2024)

Community: Google Women Techmakers Ambassador (2019-Present); Figma Community Founder & Leader - Friends of Figma, Tunis (2023-Present); GDG Co-Organizer (2019-Present); Technovation WTM Media Council (2026-Present); Speaker - DevFest & GDG MENAT Summit 2025
